

MASS YOUTH SOCCER'S US SOCCER CONNECT

PLAYER UPLOAD FORMAT IMPORT GUIDE

This guide provides our town/club Registrars with instructions on to create the Player Upload Excel files for uploading player registration data to Mass Youth Soccer. The file is different from those used in the past. It now includes information needed by US Soccer for uploading information to the National Data Center as well as specific columns of data unique to the US Soccer Connect system from Stack Sports.

Use the Import Template provided via the Mass Youth Soccer website, Registrations Fall 2019 page.

Below are the fields that are available for import via the upload. It is important to review this guide including the notes for each field. The term “String” in the Format column means an alphanumeric line of text is used.

If the Format states Leave Blank, do not enter anything in these cells. This will be handled by Mass Youth Soccer after upload.
