

# Signage Recommendations

Massachusetts Youth Soccer recommends having COVID-19 signage in place throughout field facilities used by our member organization. Signage is **highly recommended** by those that own or operate facilities. The signage should be placed frequently throughout, reminding visitors to take the appropriate steps to prevent the spread of COVID-19. The messages found on these signs should include information about:

- Staying home if you are sick or do not feel well, and what you should do if you are not feeling well.
- Using Physical/Social distancing to maintain a distance of 6ft. between others while in all areas of the facility.
- General hygiene - Covering coughs and sneezes, washing hands (especially after using the restrooms), and to avoid touching eyes, nose and mouths with unwashed hands.
- Using cloth face coverings as required.

Below are some examples of the signs that can be used:

You can purchase these signs and others at the following websites:
